

Innovation and Social Entrepreneurship - exchange of experiences is the title of an Individual Mobility project for Learning purposes, promoted by the Cultural Recreation Social Association and Bem Fazer Vai Avante, for the promotion and dissemination of youth entrepreneurship based on ethics and morality and linked to the resolution of social conflicts. The goals are closely linked to current labels such as social inclusion, the labor market, employment policies, innovation or Euroscepticism.

It is an integrative project that aims to explore the possibilities of social entrepreneurship in different areas, with meetings at the university (educational level), municipalities (political field), small and medium-sized incubators (commercial field) and between non-profit organizations (social and youth field).

The results achieved are related to the greater penetration of European policies among the youth of neighboring countries, the promotion of a more humanistic entrepreneurship linked to the solution of social problems and, above all, the commitment to development and innovation in offering new opportunities to young Europeans.

The project was carried out in Yerevan (Armenia) from May 28 to June 4, 2022.

The activities were highly participatory and interactive with the citizens involved, with the organization of meetings, discussions and debates, presentations, workshops, seminars, round table, working group, brainstorming, exchange of good practices and other activities to develop an active and promote interactions between the young people involved.

The project was approached through a methodology in which citizens and participants were the real actors of the project with their opinions, experiences and points of view. In this way Europe has become a more tangible and visible reality. Through these activities, a contribution was made to the implementation of the EU Agenda for the future.

Practical workshops were held to exchange knowledge and experiences on awareness of the Future of Europe and its perception of the challenges that the EU is called upon to face.

The future of Europeans depends on the direct involvement of citizens, whose aspirations are necessarily projected into the future. According to the priorities of the European Commission, the project aimed to give the opportunity to develop their sense of European citizenship with the involvement of direct and indirect people.

The project « Innovation and Social Entrepreneurship - exchange of experiences » was financed with support from the European Union under the Erasmus + Programme.
